ABOUT ME

I bring a rich blend of skills to my role as a Frontend Developer, with a background spanning graphic assistance, manufacturing operations, and production technology . From overseeing design processes to optimizing manufacturing workflows, my diverse experiences inform my approach to crafting visually appealing and high-quality web solutions. With a meticulous eye for detail and a commitment to excellence, I collaborate closely with teams to deliver streamlined, efficient, and aesthetically pleasing frontend projects, leveraging a comprehensive toolkit of technologies including React, Redux, Next.js, TypeScript, JavaScript, HTML/CSS, TailwindCSS.

WORK EXPERIENCE

Dec 2023 - March 2024
Freelance | Remote

Front End Developer

As a Front End Developer, I developed projects based on Figma design specs, collaborating closely with designers to enhance functionality and optimize development processes. Specializing in reusable components, I streamlined project development and improved efficiency. I actively participated in team discussions, used Trello for task tracking, and followed Agile methodology for timely delivery and adaptability. Utilizing Next.js, TypeScript, and TailwindCSS, I built robust, scalable web applications with high code quality.

Apr 2023 - Jul 2023
BerlinLab | Remote

Front End Developer

As a developer, my responsibilities included developing landing pages, addressing bug fixes, performing markup tasks, and implementing small features. I actively contributed to the development of a project focused on the sale of photo/video products. Throughout these tasks, I utilized various tools and technologies to ensure efficient project delivery and high-quality results.

May 2019 - Dec 2022
Škoda Auto | Mlada Boleslav, CZ

Production Technologist

A work production technologist oversees and manages manufacturing processes, ensuring efficient production and quality standards. I coordinate with the production team, monitor machinery, and troubleshoot any operational issues to maintain a smooth workflow. Additionally, a work production technologist plays a key role in optimizing production schedules and implementing safety protocols within the manufacturing environment.

June 2018 - December 2018
BAT Ukraine | Pryluky, Ukraine

Middle Manufacturing Operator

As a middle manufacturing operator, I take charge of production processes, ensuring quality and safety standards are met. Also I led a team of employees to optimize the work process. coordinating with the engineering department to resolve issues

Dec 2016 - June 2017
Mindy Supports | Kyiv, Ukraine

Graphic assistant

As a graphic assistant, my role involves overseeing various design processes and ensuring the delivery of visually appealing and high-quality graphics. I operate design software, troubleshoot any design-related issues, and collaborate with the creative team to achieve cohesive and visually engaging outcomes. In this role, I contribute to the artistic and aesthetic aspects of the projects, striving for excellence in graphic design.
